Key Skills	
Set up Investigations	Investigate simple enquiries or comparative experiments.
Understanding Observations	Gather, record and present data from the investigation.
Making Conclusions	Understanding what the results show and making an accurate conclusion.
Real scientists are always inquisitive!	ASK QUESTIONS and take an interest in science. It is all around us!

## Home activities

**Visit:** Science Oxford, Science Museum in London

### Investigate:

How balanced is your family's diet? Make a survey and find out how much of each food group is eaten by your family each day.

### Make:

A balance meal!
